

- City Limits
- Old Map Sheet Boundary
- Parcel Boundary
- Easements
- Building Footprints

- 22 Old Map Sheet Numbers
- 795 House Number
- 14 Parcel Lot Number
- 6272 Parcel size in square feet
- 65.0 Survey Dimension
- (125.0) Land Dimension
- 44.0LC Land Court Dimension

All Tax data is shown at a scale of 1 Inch = 100 Feet.

All Real Property data contained in this atlas was compiled from the 291 existing Assessor’s Tax maps maintained by the City Assessor’s Office and the Department of Public Works. Parcel boundary data was NOT compiled through property research and recompilation. The parcel boundaries were electronically registered to the GIS orthophoto/planimetric base through a process of controlled graphic adjustment. This data is suitable for assessing purposes.

All Maps are Oriented North/South with the Title bar on the right

This Atlas was produced using the City of Cambridge Geographic Information System (GIS). The GIS is a computer based program that provides tools for spatial data analysis. In particular the system enables spatial or geographic data to be stored, retrieved, manipulated, analysed and mapped. The GIS is being implemented City-wide by the City of Cambridge MIS Department.

The GIS was implemented in 1995 to assist in the mapping and analysis of the City’s Geography.

For further information regarding the GIS contact:  
Peter Bujwid, MIS Department (617) 349 –4140
